Polymer Degradation and Stability **42** (1993) 353–355

CONTENTS OF VOLUME 42

Number 1

Polymer complexes: XXIV. Physico-chemical studies on coordination and stability in relation to IR data for poly(cinnamaldehyde-anthranilic acid) complexes of d-block elements 1
A. Z. El-Sonbati, A. A. El-Bindary, M. A. Diab, M. A. El-Ela & S. A. Mazrouh (Egypt)
Primary thermal degradation mechanisms of PET and PBT 13
G. Montaudo, C. Puglisi & F. Samperi (Italy)
Model experiment on the protection effect in polymers: radiolysis of liquid squalane in the presence and absence of additives 29
Y. S. Soebianto, Y. Katsumura, K. Ishigure, J. Kubo, T. Koizumi, H. Shigekuni & K. Azami (Japan)
The thermal degradation of poly(phenylene sulphide)—Part 1 41
O. A. Peters (Nigeria) & R. H. Still (UK)
The thermal degradation of poly(arylene sulphide)—Part 2. Vacuum pyrolysis of low molar mass poly(phenylene sulphide) 49
O. A. Peters (Nigeria) & R. H. Still (UK)
Light stabilizers of HALS type with regulated molecular mass 55
Š. Chmela, P. Hrdlovič (Slovak Republic)
Thermo-oxidative degradation of linear low density polyethylene melts 61
G. Williams, M. R. Kamal & D. G. Cooper (Canada)
Quantitative analysis of additives in polyethylene by MID mass spectrometry 69
A. I. Vit, M. N. Galbraith, J. H. Hodgkin (Australia) & Deng Yan (China)
Kinetics of the thermal degradation of partially *para*-brominated polystyrenes 75
B. Boinon, W. Abboud, A. Bouras (France) & D. Ainad-Tabet (Algeria)
Time-dependent delayed radiation-induced conductivity in nickel polymethacrylate—III 81
F. A. Khwaja, M. M. Pasha, M. Ashgar & G. S. Bhatti (Pakistan)
Thermal-mechanical degradation of linear polyethylene copolymer polymerized with two supported catalyst systems 89
A. Harlin (Finland)
The mechanism of the low-temperature oxidation of polypropylene 95
P. Gijsman, J. Hennekens & J. Vincent (Netherlands)
Crystallization behavior and thermal stability of HDPE filled during polymerization . 107
L. Minkova (Bulgaria) & P. L. Magagnini (Italy)
Quantum-chemical study of radical reactions in polymer systems II. Study of mechanism of regeneration of nitroxyl radicals from HALS inhibitors by acylperoxyl radical attack—comparison with peroxyl radicals 117
O. Kysel & P. Mach (Slovak Republic)
Calendar 123

Number 2

Polymeric light stabilizers based on siloxanes 127
H. Friedrich, I. Jansen & K. Rühlmann (Germany)

Polymer Degradation and Stability (**42**) (1993) © 1993 Elsevier Science Publishers Ltd.

Surface modification of bisphenol-A-polycarbonate by far-UV radiation. Part II. In air 145
M. R. Adams & A. Garton (USA)
Studies on the thermooxidation of ethers and polyethers. Part III: Inhibition of the thermooxidation of polyether alcohols by trivalent phosphorus compounds 153
U. Hähner & W. D. Habicher (Germany)
Studies on the thermooxidation of ethers and polyethers. Part IV: Inhibition of the high temperature oxidation of polyether alcohols by trivalent phosphorus compounds . 159
U. Hähner & W. D. Habicher (Germany)
Thermo-oxidation of crosslinked polyethylene: Influence of the antioxidant 167
P. V. Zamotaev, Z. Strel'tsova (Ukraine), L. Matisova-Rychla & I. Chodak (*Slovak Republic*)
Development of a light dosimeter sensitive to the visible region of the solar spectrum . 175
N. S. Allen, E. Pratt, D. M. McCormick & A. Davis (UK)
Thermal degradation of commercial fluoropolymers in air 181
B. B. Baker Jr & D. J. Kasprzak (USA)
Medium effects on the thermal dehydrochlorination of poly(vinyl chloride) 189
V. H. Tran, C. Garrigues, T. P. Nguyen & P. Molinié (France)
Compatibility of HALS-nitroxides with polyolefins 205
V. Dudler (Switzerland)
Recycling of heterogeneous plastics wastes. II—The role of modifier agents 213
F. P. La Mantia (Italy)
Calendar of events 219

Number 3

Cellulose thiocarbonate-ferric nitrate redox system induced graft copolymerization of vinyl monomers on to cotton fabric 223
M. H. El-Rafie, M. K. Zahran & A. Hebeish (Egypt)
Photodegradation of UV screeners 231
J. E. Pickett & J. E. Moore (USA)
In-vitro detection of 2,4- and 2,6-TDA as degradation products of a polyesterurethane foam 245
H.-M. Do Luu & K. D. White (USA)
The efficiency of 2-(2-hydroxphenyl) imidazole derivatives as copper deactivators in radiation crosslinked low density polyethylene 253
K. Schipschack, H. Wagner, J. Beger & R. Neumann (Germany)
Effect of oxygen on the degradation of polypropylene initiated by ionizing irradiation . 263
B. A. Gorelik, I. V. Kolganova (Russia), L. Matisová-Rychlá (Slovak Republic), G. I. Listvojb, A. M. Drabkina, A. G. Golnik (Russia)
Photo-oxidation of polydimethylsiloxane oils Part III—effect of dimethylene groups . 267
Y. Israëli, J. Lacoste, J. Cavezzan & J. Lemaire (France)
Polymer degradation mechanisms: New approaches 281
R. Lehrle, D. Atkinson, S. Cook, P. Gardner, S. Groves, R. Hancox & G. Lamb (UK)
Thermal and photooxidative behaviour of 2-hydroxybenzophenone stabilisers in polyolefin films: Effect of 4-butoxy-4-amino-tetramethylpiperidine substitution 293
N. S. Allen, M. Edge, J. He, W. Chen (UK), K. Kikkawa & M. Minagawa (Japan)
Thermal oxidative degradation of an epoxy resin 307
N. Rose, M. Le Bras, R. Delobel, B. Costes & Y. Henry (France)
Thermal and photochemical degradation of dodecylsulfate-doped polypyrrole 317
W. A. Gazotti Jr, V. F. Juliano & M.-A. De Paoli (Brazil)
An *in situ* Raman spectroscopic study of the degradation of PVC. 323
J. P. H. M. Hillemans, C. M. C. J. Colemonts (Belgium), R. J. Meier & B. J. Kip (The Netherlands)

Physical spreading of oxidation in solid polypropylene as studied by chemiluminescence 335
M. Celina, G. A. George (Australia) & N. C. Billingham (UK)
The thermal degradation of poly(di-*n*-hexyl itaconate) prepared in the presence of *n*-dodecyl mercaptan 345
I. G. Popović (Yugoslavia), L. Katsikas (Germany & Russia), K. A. Voloshchuk (Russia), S. Schrötter (Germany & Yugoslavia) & J. S. Veličković (Yugoslavia)
Calendar of events 351
